

Introduction

Thoughts on Jane Street Puzzle

Picture of board game with notecard. Entitled "Turn-based Strategy Game" Card asks' "What 6-letter word is this diagram asking?"

- Based off of "Octile Board game" Seen on BGG.
- 6x3 grid? Could each letter be encoded in one across row?
- Only 4 colored pieces: Red, Teal, Yellow, and Pink
 - 5 Red, 5 Teal, 4 Yellow, 2 Pink
- 6 pieces within the 12 center squares. Could these be the terminating signals?
- Is there some form of warping across the paths
 - Does each path that ends at a peg on border indicate that one should copy the board to there?
 - How long does this go for?
- PIGPEN cypher from six pegs in center? Terminate at blank squares? Sum of path lengths is Letter?
- Seems to be a slight typo in "asking". Could this be a clue?
- Betamaze?
